Phase Proportion

- Marking Proportion

Injection Proportion

Dissection Proportion

Idle Proportion

## Calculation Formula:

Variable  $x_1 = \frac{\text{Injection Proportion}}{\text{Dissection Proportion}}$

Score A =  $-2.516 \times 10^{-5} x_1 + 0.1945$

Variable  $x_2 = \frac{\text{Continues Dissection Period}}{\text{Dissection Duration}}$

Score B =  $0.0009609 \times e^{-0.0001791x_2}$

- Marking
- Injection
- Dissection
- Idle
